Training for Microsoft¹ Products

. . . . Word, Excel, PowerPoint, Outlook, Windows
and more

At **Innovatis**, we deliver a full range of **coaching / training courses** for **Microsoft** products to suit all levels of ability, so you can be sure that your training is matched precisely to your needs.

The following brochure shows full details on:

- Outlook training

Microsoft has established the Microsoft Office suite as the most widely-used set of applications for document creation, communication and business information analysis. As a result, skills in Word, Excel, PowerPoint, Outlook and Office itself have become key requirements for staff in today's business environment. Even for more specialised jobs, Microsoft has solutions like **Publisher**, **Project**, **FrontPage** and **Visio** that integrate seamlessly with their basic applications.

For details of training in other Microsoft products, please contact us and we will be pleased to send a full schedule of course contents.

We are also happy to combine elements of our various programmes to fully meet your needs.

We specialise in private training tailored to suit your specific needs, and are happy to arrange group training courses for all popular Microsoft Office applications to suit different levels of ability.

Tailored course design comes to you at no extra cost, and training can be at your premises or at our training facilities in Amstelveen.

Your training in Microsoft products can be assisted by our **skills appraisals**, which are provided on all Microsoft Office applications and, if you need individual attention, you can benefit from a mentoring service where we can guide you through your progress before, during and after attendance on any training course. Full support is provided to you when you put the courses into practice.

For full details of our Microsoft Outlook training courses, please see the following brochure.

Microsoft Outlook training Communication and Time Management in One

Go to a course name for full details :

- [Microsoft Outlook Introduction](#)
- [Microsoft Outlook Advanced](#)

Accessing and communicating with others is increasingly important, especially with the popularity of the Internet and e-mail.

However, with the removal of barriers and increased speed of communication comes an overload of information in the form of e-mails, appointments, contacts, tasks, and documents. Microsoft Outlook can help users manage their time and information more effectively, while making it easier to share information with others.

Innovatis delivers Microsoft Outlook training at both Introductory and Advanced levels, for which personalised courses can be designed and delivered to ensure a targeted and particularly effective solution.

Group-level courses are also provided, which can help ensure that all members of an organisation are using the product in a consistent way – especially important where *contacts* (such as customers) or *agendas* are shared.
